Jason Proctor – Chief Technology Officer

Jason Proctor is chief technology officer of Armored Online, a technology and services company that delivers a secure, private branded channel that establishes a trusted environment for financial institutions and their customers to communicate and transact. Mr. Proctor is responsible for managing the overall technology quality of the company's solutions. He advises the executive team on the company's technology position and direction, and establishes and maintains relationships with technology partners.

Mr. Proctor has 20 years experience in software development, project management, and sales support. As principal engineer at Bear River Associates, he pioneered multiple tier application development techniques which are today regarded as industry standards. While serving as senior engineer at Software Ventures Corp, Mr. Proctor developed a completely asynchronous SSL implementation as part of the development of a small-footprint high-speed web browser. In his role as principal engineer at Insignia Solutions Inc, he brought networking functionality to SoftPC and helped spearhead its adoption by major financial players such as Swiss Bank Corp, Merrill Lynch, and BZW.
